Winter Weather Reminders

As the snow flies this winter, the Borough would like to remind all property owners that they must clean their sidewalks of ice and/or snow within 24 hours after the precipitation stops. All sidewalks must be cleaned to a minimum of 3 feet in width for the safety of all who pass by. Failure to do so could result in a fine of up to $100 plus court fees. You may want to take some time now before the bad weather hits to make arrangements with a neighbor or friends to take care of your sidewalks should you be unable to do so or if you will be out of town.

In the event of snow, Paxtang Highway employees will work to ensure the roadways are cleared. If there is a particularly large amount of snowfall, the Mayor may declare a snow emergency. During a snow emergency, there are certain parking restrictions that help our Highway employees clear the snow easier. Residents are encouraged to view the Paxtang Borough Code to see where parking is restricted. The code is available online at www.paxtang.org or a copy is available in the Borough Office. The Paxtang Shade Tree Commission will be looking at new trees to be planted and removed this year. The Commission will also be conducting routine inspection of trees and ground level pruning.

A number of trees were removed and trimmed this past year and new ones were planted. Residents can arrange to have an honors tree planted to recognize a happy event in the family or someone who has passed away. The fee of $250.00 includes the tree, plaque and certificate.

The Shade Tree Commission is always looking for volunteers to either serve on the commission or help with inspection of trees and ground level pruning. Our Volunteers help to ensure that we maintain our trees in the Borough.

Please remember to not let ivy grow up the trees in front of your residence. Ivy can kill otherwise healthy trees!

Please let us know if you’d like to have a shade tree at your property this spring, or if you’d like to arrange for an Honors Tree to be planted in memory or honor of a loved one.

The Paxtang Shade Tree Commission is comprised of volunteers from the community who give their time to tend to Paxtang’s urban forest. Volunteer members maintain an inventory of all the trees in the Borough, decide which trees to plant and which to remove, conduct regular pruning and maintenance to ensure the health of the trees and safety of Borough residents.

**Winter Storm Salting: Impacting our Waterways**

Salt and sand are two traditional materials used in winter maintenance to combat snow and ice.

**Impacts of Salt and Sand**

Many people do not realize that salt and sand have hidden impacts that can detract from their overall effectiveness. Even when applied in relatively small quantities, salt can:

- Deplete the oxygen supply needed by aquatic animals and plants
- Leach into the ground and change the soil composition
- Leach into the groundwater, contaminating sources of drinking water
- Deteriorate paved surfaces, buildings, infrastructures, and the environment
- Drains, and surface waters if it is not swept up each spring
- Contribute to plugged storm drains, which can cause flooding

Similarly, sand can:

- Bury the aquatic floor life, fill in habitats, and cloud the water
- Erode the stream banks and landscapes
- Cause premature deterioration of floor surfaces
- Lose its effectiveness after becoming embedded in snow and ice
- Enter catch basins, storm drains, and surface waters if it is not swept up each spring
- Contribute to plugged storm drains, which can cause flooding

More environmentally friendly alternatives to sodium chloride are acetates, potassium chloride, or magnesium chloride.
